

Maser Communications (UK) Ltd

Industrial Cable News

New Member to the Cable Team

Matt Williams

In our continued expansion, Maser (UK) are pleased to announce the appointment of Matt Williams in an industrial sales role, based out of Doncaster. Matt comes to Maser with a wealth of valuable cabling experience, working previously for a number of leading industrial cabling manufacturers inc Draka special cables.

Putting his 20 years cabling experience to good use, Matt is currently targeted with expanding our business within the industrial wholesale and resellers markets, initially in our Northern region and eventually expanding to a national role.

Commenting on his new role, Matt said "Maser (UK) was the natural choice, given that the company is very customer focused and forward thinking." Drawing on his experience of having worked for an American recruitment consultancy Matt added, "we are currently in what I like to call, the bricking stage, i.e.; laying the foundations, the more bricks we lay the more solid the foundations, the longer and safer the building will stand" mirroring the ethos of our company, that Maser are here for the long term not the short term.

Matt will work out of our newly opened office north of Doncaster, working alongside our Business Development Manager; Mark Degnan, strengthening the office and providing a valuable resource to both our customers and ourselves

Matt can be contacted either by Email: matt@masercomms.co.uk Ph:01427 875 115, or Fax: 01427 - 875 311

Belden Expands Its Line of DataBus Cables for Fieldbus Applications

New FieldBus Type A multi-pair cables and foil/braid cables provide installation, flexibility in many different environments and where multiple or extended cable runs are required.

Fieldbus is an all-digital, serial, two-way communications protocol (9HS1) that standardises the interconnection of field devices at a communications rate of 31.25 kB/s. The field devices are made accessible to communication networks, through use of linking devices.

Fieldbus users can reduce the amount of I/O and control equipment plus they can use few intrinsically safe (IS) barriers, cabinets, cables and connectors. End users have the freedom to implement tightly integrated digital control based on a unified system architecture (HS1) and a high-speed backbone (HSE) for plant operations. This in turn removed the constraints on device and sub-system interoperability.

Why FOUNDATION Fieldbus?

With FOUNDATION Fieldbus, end users have the freedom to implement tightly integrated digital control based on a unified system architecture and a high-speed backbone (HSE) for plant operations.

Fieldbus Cabling features:

- Compliant with FieldBus Spec IEC 61158-2
- Excellent electrical characteristics
- Low capacitance
- Versions in 22, 18, 16 and 14 AWG stranded tinned copper conductors
- Multi-pair cables available in 2 to 24 pairs
- PLTC-ER versions available
- Polyolefin insulations
- Beldfoil® shields
- Easily identifiable orange jacket
- Suitable for use in Class 1, Div. 2 applications
- RoHS compliant with CE approved.

**Win a Maser
Shirt!**

Happy New Year!

All the staff at Maser (UK) Ltd hope you had a wonderful Christmas and a Happy New Year. We hope 2007 will be a great and successful year for all of us.

We wish you all the best in 2007 and look forward to working with you throughout the year.

Win one of these great Maser shirts by answering this easy question-

'Which Maser UK office is our new Industrial Account Manager—Matt Williams working at?'

**A: Southampton
B: Doncaster**

Maser — Right Cables, Right Here

Maser UK are proud to be chosen to represent Belden as a specialized distributor for the supply of Belden's extensive range of cables to the Broadcast, Pro-Audio/Video and Industrial cable markets in the UK and Ireland. Maser UK is also a partner for Trompeter, who produces HD BNC Connectors to mate with the Belden Video Brilliance range of HD Coaxes and Alpha Wire, who provide advanced solutions and service in wire, cable and tubing.

Through these partnerships Maser can offer you a quality solution to the following applications:

- **Broadcast Audio Cable**
- **Broadcast Video Cable,**
- **Broadcast Fibre Optic Cable**
- **Audio Video Connectors**
- **Industrial Cable.**

We hold extensive stocks of Belden cable and matching connectors at our warehouse in Hampshire, ready for your next application. Whether you require just one reel of cable or hundreds Maser offers you a personal service dedicated to ensuring a high level of customer satisfaction.

New Staff member for Southampton office

David Roberts has recently joined Maser UK in the Southampton office as Materials Manager.

Welcome Aboard David!

Maser helps to supply for 15th Annual Asian Games

Maser Communications (UK) Ltd has assisted one of their customers, NEP Visions to help capture the action of the Asian Games, supplying them with Belden HD Coaxes and Trompeter HD BNC's.

NEP Visions captured more than 2000 hours of the 15th Annual Asian Games in Doha, Qatar (Dec. 1-15 2006), in HD. NEP provided exclusive coverage of the Asian Games' opening and closing ceremonies, and all the athletics and gymnastics in HDTV, in addition to extensive coverage of the various competitions.

To cover the 39 sporting events from more than 40 venues, NEP Visions secured a significant amount of production equipment, nearly 95 tons of equipment in fly packs to Doha. Additionally, NEP Visions sent more than 80 digital architects and engineers to work on site.

The Asian Games, which take place every four years, is the second largest International multisport, multinational event after the Olympic games.

Email your answer and your contact details to sales@masercomms.co.uk

Winners of the shirts will be drawn at random at the end of Feb 07 & notified by email
